

Electric heating elements for industrial furnaces

ELECTRIC HEATING ELEMENTS

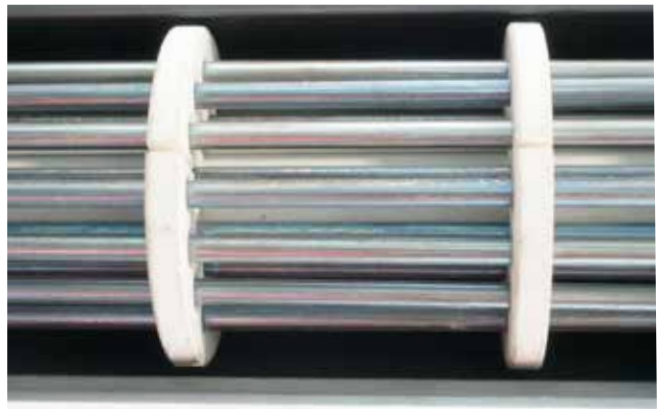

STRIP HEATING ELEMENTS

- High power density
- Power above 50 kW
- Low surface load
- Long lifetime
- Especially suitable for the conversion from gas to electric
- Suitable for radiant tubes
- Horizontal and vertical installation

ROD HEATING ELEMENTS

- For medium-power applications
- Suitable for the conversion from gas to electric
- Suitable for radiant tubes
- Horizontal and vertical installation

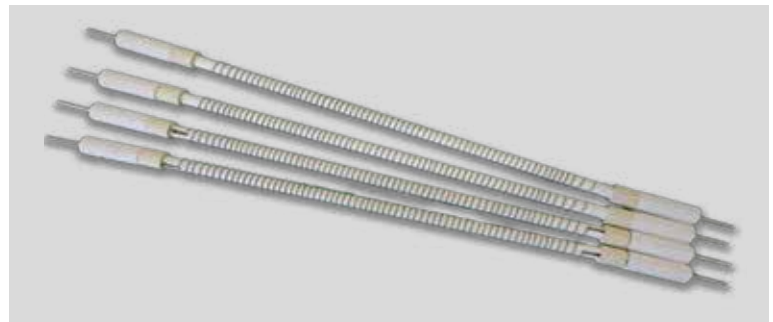

CAGE HEATING ELEMENTS

- For high-power applications
- Up to 50 kW
- Suitable for the conversion from gas to electric
- Suitable for radiant tubes
- Horizontal installation
- Single-phase and triple-phase connection possible

ROD HEATING COILS (SPIRAL TYPE)

- For low-power applications
- Cost-efficient assembly
- Horizontal installation
